

Table 8c: Total endemic and threatened endemic species in each country (totals by taxonomic group): PLANTS

Total number of endemic and threatened endemic plant species recorded for each country for comprehensively assessed groups only.

Endemics = species that are known to occur naturally within one country only.

Threatened = species assessed in any of the three threatened Red List categories (Critically Endangered, Endangered, Vulnerable)

ERRATA: This is a corrected version of the original table that was published for the 2017-1 Red List, where the column "Total Endemics" erroneously displayed total number of threatened species (including endemics and non-endemics)
